AMERISTEP®
Quality Hunting

2012 PRODUCT CATALOG
WWW.ameristep.com

20th
ANNIVERSARY

In 1992, family owned and family run Ameristep began with a single tree step. In only four short years they became the premier producer of tree steps in the hunting industry. Six years later Ameristep introduced new, top quality ground blinds. Within a year of introduction, the popular ground blind category was created. With safety being a driving factor at Ameristep, the creation of their first one-size fits all harness was launched also in 1998. By 2003 Ameristep took it to new heights with their new and innovative tree stands.

Today, 20 years later Ameristep continues to lead the hunting industry in many categories. Ameristep puts great focus in introducing new innovative products every year. They also pride themselves with continuing to serve and satisfy their customers as if they were part of the family that helped start it all.

Ameristep ... Redefining quality time for generations.

SPIDER HUB TECHNOLOGY

CARBON GUARD CARBON ENHANCED

REALTREE AP

Replaceable shoot-through mesh windows with gun port

BLIND DIMENSIONS
75" shooting width x 67" tall

> **Hunting out of a ground blind, a hunter should be able to stay invisible,** reduce noise, scent and have 360 degrees of shooting with a bow, crossbow or gun, even when hunting with a cameraman or friend. The Bone Collector Blind does just that. It's so effective, it might get outlawed. This blind definitely changes the way I will hunt in the future. IT rocks!

AMERISTEP TECHNOLOGY

NS³ TECHNOLOGY NO SCENT. NO SHINE. NO SOUND — Quiet micro-fiber exterior and carbon enhanced laminated interior. NS3 technology: No Scent. No Shine. No Sound.

DURASHELL — Outer shell constructed with a quiet, weather-proof and wear-resistant material.

POLY COTTON — Durable poly-cotton outer shell reduces noise and sheen.

EDGE RELEAF — Realistic 3-D leaf system that delivers the ultimate concealment in the field.

SHADOW GUARD CARBON ENHANCED — Carbon enhanced, scent blocking black interior eliminates shadows and silhouettes.

HST HUB-STYLE TECHNOLOGY — Rugged hub assembly that provides excellent stability and easy setup.

TTS Truss Technology System — **SAFE. SIMPLE. STRONG.** Hunt Locations that were never an option before. The Truss Technology System (patent pending) replaces the traditional stabilizer bar found on every other ladder stand.

SPIDER HUB TECHNOLOGY — A superior metal-stamped hub design that maximizes strength over traditional cast hubs and ensures a lifetime of usage, unaffected by extreme weather or the structural inconsistencies of cast material.
